

REMARKS

Claims 1-9, 11-20 and 25-29 are pending in the present application. Claims 1-9, 11-20 and 25-29 are indicated as allowed by the Examiner.

The Examiner has objected to claims 18-20 for formalities. It is the Examiner's position that the terms, "a first electrical contact", "a second electrical contact", "a third electrical contact", "a fourth electrical contact", "a first electrode", "a second electrode", "a first electrode holder" and "a second electrode holder", used in the claims, are not recited in the specification. The Examiner has further required amending the specification to include the terms for clarification.

In this regard, Applicants have amended Paragraphs [0043], [0047] and [0048] of the specification to include the above-mentioned terms. The terms are incorporated in the parentheses following the corresponding elements of the terms first described in the specification.

Furthermore, Applicants have amended Paragraph [0050] of the specification to prevent confusion of the terms, "a clamping head 1420" and "an electrical contact 1420". By the amendments, the electrical contact is identified by numeral 1620, instead of 1420. Applicants also submit herewith a replacement sheet of the drawing containing Figure 14, in which the electrical contact is identified by numeral 1620.

In view of the foregoing amendments and remarks, it is respectfully requested that a Notice of Allowability be issued in due course.

Respectfully Submitted,

Frank S. DiGiglio
